### **PSA on Temporary Suspension of Operations at Desert Diamond Casino Why**

The Desert Diamond Casino in Why announced today that it is temporarily closing casino and convenience store immediately after confirmation that a casino team member has tested positive for COVID-19. Given the seriousness of this development, and to assure the safety of team members and the public, both the convenience store and casino in Why will temporarily be closed.

At this time a single individual with COVID has been identified. In accordance with CDC guidelines and other safety protocols, during the closure contact tracing and additional testing for other team members is being done, and an extensive disinfection of the facility will take place.

Safety is the top priority for Desert Diamond Casinos, and this precautionary closure is being done to protect guests, team members, and the community. Desert Diamond has implemented comprehensive safety measures at all properties including temperature checks, mandatory face coverings, social distancing, and enhanced cleaning procedures.

Closure of the Why facility does not affect any of the other Desert Diamond Casino operations, and the Enterprise will provide additional updates when the Why facility is ready to re-open.
