

Tohono O'odham Nation Health Care (TONHC)

COVID-19 Situation Update: October 7, 2020 T-Ñukuda Ha'icu Cihañig

This is a rapidly evolving situation. Information is based upon data as of October 7, 2020 at 7:00 and may change as more data becomes available.

COVID-19 Data among Members of Tohono O'odham Nation (TON)

Total Cases Percent Positive Tests This Week Recovering Recovering (%) Deaths

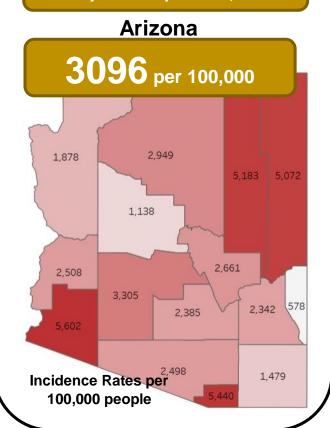

1 % 437 80% 28

COVID-19 Contacts Interviewed

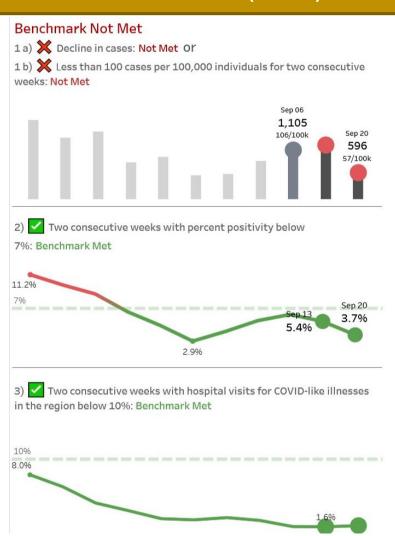

1,414

COVID-19 Cumulative Incidence
Rate among TON members residing
on the Tohono O'odham Nation

2,589 per 100,000

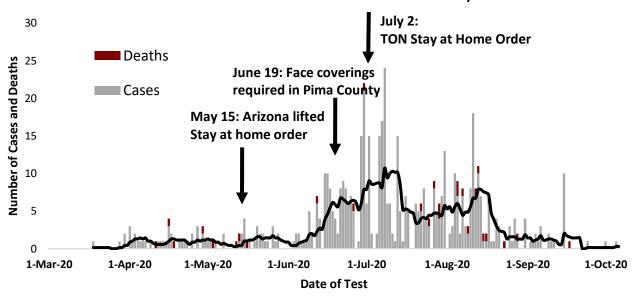

Pima County COVID-19 School Reopening Benchmarks Not Met (10/8/20)

Incidence rate is the number of new cases of COVID-19 in the population over a specified period of time. This allows comparison of areas with different population sizes. Population size is from http://www.tonation-nsn.gov/districts/ (Fall 2016), accessed 8/26/20.

Confirmed COVID-19 Cases and Deaths by Date among Enrolled Tohono O'odham Nation Members, 2020

7-day average is the average of cases for that day and the 6-days prior

What's NEW?
COVID-19 vaccine phase 3 (human efficacy) studies are underway. Before any vaccine is available, it must be approved by the Food and Drug Administration, reviewed by the Advisory Committee on Immunization Practices, and provided to States, Tribes, and Territories by the Centers for Disease Control and Prevention. TONHC is already collaborating with Pima County and the State in preparation for the COVID-19 vaccine.

The COVID-19 pandemic is not yet under control in Arizona or the Tohono O'odham Nation. As of 6/15/2020, we have detected a surge in cases in the Tohono O'odham Nation. This means

	Enrolled Member of Tohono O'odham Nation (TON)	Pima County	Arizona
Total Cases	547	26,092	222,538
Incidence Rate (per 100,000)	2,589 (in TON)	2,498	3,096
Number Deaths	28	629	5,733
Deaths (% of total cases)	5%	3%	3%
Number Hospitalized	93	2,066	20,050
Hospitalized (% of total cases)	17%	8%	9%

there is a sudden upward trend in the number of cases. We continue to have community-wide transmission. Please continue public health efforts to control the spread, such as:

- Staying home as much as possible
- Hand hygiene
- Physical distancing
- Wearing a mask/face covering when physical distancing is not possible

TONHC is a safe place for care. Your health and wellness is important to us. Our mission is to provide healthcare with a focus on quality, safety, and trust. TONHC is following all national and local guidelines during the COVID-19 pandemic to ensure that our facilities are number one in safety. We invite you to schedule a Primary Care, Same Day visit, or testing appointment today. TONHC Situation Update 10/07/2020 7:00

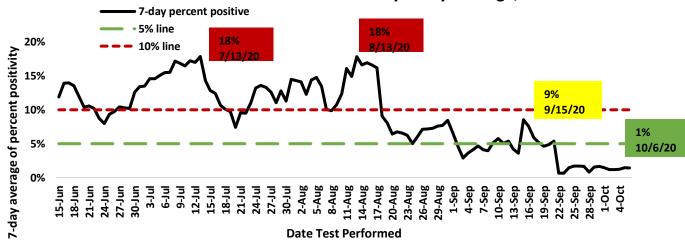

Wear a mask, physically distance, and wash your hands to protect Tohono O'odham Nation

The flu vaccine has arrived! Please get your flu vaccine! Come to a flu clinic scheduled by public health nursing or call one of the TONHC clinics to schedule your flu vaccine. This year, protecting yourself and your loved ones against the flu is even more important because of the COVID-19 pandemic. During the COVID-19 pandemic, many people and especially children got behind on their routine vaccines, so we urge the public to ask their provider to help get them updated as soon as possible. Seasonal influenza (flu) vaccines are available at all TONHC clinics.

Effective 9/24/2020, patients with no symptoms and no known exposure to someone with COVID-19 can be tested at TONHC. For all testing, please call and schedule an appointment at your clinic.

4,812 COVID-19 Tests Performed at TONHC

TONHC COVID-19 Test Percent Positivity 7-day Average, 2020

Weekly test percent positivity is calculated using the day tests were performed and 6-days prior (7-day detected "positive" results)/(7-day total tests performed) x 100

Tohono O'odham Nation COVID-19 Positive Case Information

	Enrolled Member of Tohono O'odham Nation	Enrolled Member of Another Tribe or Other	Total
Residing within Boundaries of Tohono O'odham Nation	338	21	359
Residing outside Boundaries of Tohono O'odham Nation	209	75	284
Unknown residence	0	0	0
Total	547	96	643

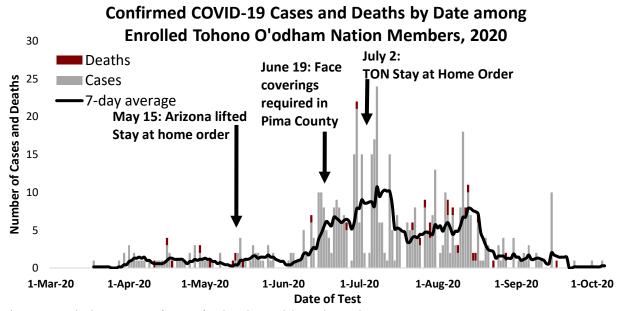

547 members of the Tohono O'odham Nation have tested positive* for COVID-19 (as of 10/7/20 at 7:00). On 9/30/2020 there were 545. This represents a less than 1% increase over the last week.[†] The number of positive cases is 7.6X the number 17 weeks ago (72 on 6/9/2020).

338 members of the Tohono O'odham Nation who tested positive reside in the Tohono O'odham Nation. On 9/30/2020 there were 337. This represents a **less than 1%** increase † over the last week. The number of persons who reside in the Tohono O'odham Nation and tested positive for COVID-19 is 14x the number 17 weeks ago (24 cases on 6/9/2020).

This is consistent with a surge in cases beginning approximately 6/15/2020.

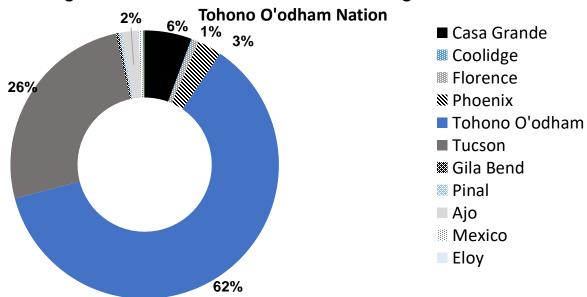

- 437 members (80%) are recovering (among members of the Tohono O'odham Nation) ¶
- 28 deaths among members of the Tohono O'odham Nation and 3 members of another tribe.
- 1 death in hospital in Tohono O'odham Nation, 30 in hospitals outside the Tohono O'odham Nation.

[¶]Recovering is defined as having diagnosis/symptom onset 14-days ago, improving, and no longer hospitalized.

7-day average is the average of cases for that day and the 6-days prior

Some areas are <1%

At TONHC, we received the first presumptive positive test result for COVID-19 for a patient seen at San Xavier Health Center in the same day clinic on 3/30/2020. In response, we reached out to clinical staff and the patient/household/community to discuss exposure risk, how to monitor for symptoms, and help guide any recommendations for isolation or quarantine. We anticipate more cases in the future, and we are working together to tackle this challenge. Employee health has reached out to staff for contact tracing. Public health nursing has conducted community contact tracing. Please remember to keep patient and employee results confidential.

TONHC Situation Update 10/07/2020 7:00

COVID-19 Laboratory Testing at TONHC

TONHC total number of COVID-19 testing (as of 10/7/2020 at 7:00): **4,812** tests performed:

- 4,446 = patients (anyone who receives care at a TONHC facility)
- 333 = employees
- 33 = first responders

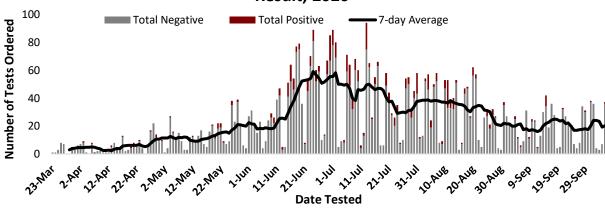

We continue to increase our testing capacity. On 9/30/2020, there were 4,666 tests.

As of 10/7/2020, 449 tests results were positive* for COVID-19. On 9/30/2020, there were

447 tests. The number of positive test results are 11.8x the amount compared to 17 weeks ago (since 6/9/2020). 38 total tests were positive on 6/9/2020.

12 TONHC employees have tested positive

Total Positive Total Positive Total Positive Average

Total Positive Total Positive Average

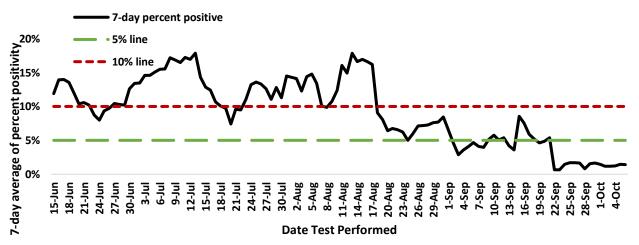

Date Tested

7-day average is the average of cases for that day and the 6-days prior

COVID-19 testing began at TONHC on March 23, 2020. There is now same-day testing at San Xavier, Sells, and San Simon. This means all the equipment to run the tests are in the clinic laboratories at San Xavier, Sells, and San Simon. We began on-site same-day testing on April 20, 2020. There are two types of tests: send-out test or same-day/rapid test. We are currently using the on-site same-day testing for all patients (5/21/2020) as there is a delay in send-out labs due to high volume. Send-out testing is still used for specific cases. As of 9/1/2020 on-site qualitative total antibody testing is available in specified cases.

^{*} Weekly test percent positivity is calculated using the day tests were performed and 6-days prior (7-day detected "positive" results)/(7-day total tests performed) x 100%

We have nine on-site Abbott ID NOW™ machines that are used for same-day testing. We are pursuing avenues for more testing machines for on-site testing. In addition to expand our testing

TONHC Situation Update 10/07/2020 7:00

Wear a mask, physically distance, and wash your hands to protect Tohono O'odham Nation

capabilities, medical assistants at TONHC completed competencies in performing COVID-19 nasal swab testing to assist with performing testing.

Effective 9/24/2020, patients with no symptoms and no known exposure to someone with COVID-19 can be tested at TONHC. For all testing, please call and schedule an appointment at your clinic.

Please note testing criteria is accurate as of 9/25/2020 and may change in the future.

*COVID-19 positive result means COVID-19 test result of "detected" for tests performed at TONHC (San Xavier, San Simon, Sells, and off-site).

[†]Absolute change in cumulative case count is the number of cumulative cases through week 2 subtracted from the number of cumulative cases through week 1, |week2 – week1|

Off-Site COVID-19 Testing Events

We are strategically expanding testing. To date, four testing clinics have been performed off-site in collaboration with TON unified command and the Arizona National Guard. At the last two testing clinics, flu vaccines were also provided. In addition we have performed testing clinics at Sells on Saturday 6/20/20 and 6/24/20 for exposed individuals.

Event Location	Date	Tested (n)	Positive (n)	Percent positive (%)	Flu vaccines administered (n)
Sells Rodeo	7/8/2020	316	17	5%	0
Santa Rosa Clinic	8/13/2020	139	5	4%	0

Baboquivari High School	9/29/2020	35	0	0%	48
Total		592	22		263

Arizona COVID-19 School Benchmarks

Pima County COVID-19 School Reopening Benchmarks Not Met (10/1/20)

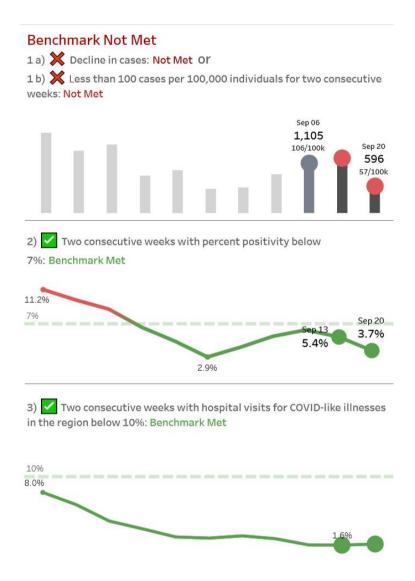

The Arizona Department of Health Services (ADHS) recommends county-specific public health benchmarks to be in the moderate or minimal transmission category in all three benchmarks for two weeks in order to provide Hybrid (virtual and in-person) learning.

The ADHS further defines community spread levels with the thresholds outlined below. These thresholds are consistent with the national standards set by the Coronavirus Task Force.

The ADHS Schools Toolkit defines community spread levels with the thresholds outlined below.

- CASES: a two-week decline in the number of cases OR a two-week of a case rate of less than 100 cases per 100,000 population within the county;
- PERCENT POSITIVITY: for initial opening, two weeks of percent positivity less than 7% within the county; and

Benchmarks	Minimal	Moderate	Substantial
Cases	<10 cases/100,000	10-100 cases/100,000	>100 cases/100,000
Percent Positivity	<5%	5-10%	>10%
COVID-like Illness	<5%	5-10%	>10%

Updated COVID-19 GUIDANCE ON HOME ISOLATION

The Centers for Disease Control and Prevention (CDC), the Arizona Department of Health Services, and Tohono O'odham Nation Health Care updated guidance on home isolation. Accumulating evidence supports ending isolation and precautions for persons with COVID-19 using a symptom-based strategy. Researchers have reported that people with mild to moderate COVID-19 remain infectious no longer than 10 days after their symptoms began, and those with TONHC Situation Update 10/07/2020 7:00

Wear a mask, physically distance, and wash your hands to protect Tohono O'odham Nation

more severe illness or those who are severely immunocompromised remain infectious no longer than 20 days after their symptoms began. Therefore, CDC has updated the recommendations for discontinuing home isolation.

CDC guidance, https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-in-home-patients.html, accessed 7/29/20.

If you tested positive for COVID-19, you need to stay in ISOLATION:

- If you tested positive for COVID-19 or are waiting for results, you should be in **isolation**. Isolation means you need to stay away from others as much as possible. You should stay in a specific "sick room," if possible, and away from other people in your home.
- If you cannot separate from others at home, you should wear a mask.
- Do not attend work, school, be in public areas, or use public transportation.
- Do not share household items like dishes, cups, eating utensils, and bedding.
- Cover coughs and sneezes with a tissue or your elbow. Throw away used tissues in the trash and wash your hands.
- Avoid touching your eyes, nose, and mouth.
- Wash your hands often with soap and warm water for at least 20 seconds.
- Clean high-touch surfaces (tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, etc.) daily.
- Reschedule all non-essential medical appointments.
- If you need medical care, call your provider **before going**, and tell them about your illness.

The number of days you should isolate at home depends on your SYMPTOMS, how SICK you were, and whether you are SEVERELY IMMUNOCOMPROMISED.

Please **look at the chart on the back of this sheet** to help you figure out how long you should stay isolated at home.

- 1) If you had any symptoms consistent with COVID-19 and had mild or moderate illness, you should isolate at home until:
 - At least 10 days have passed since your symptoms first started and
 - At least 24 hours have passed since your fever resolved (without the use of medication) and
 - Your other symptoms have improved.
- 2) If you had any symptoms consistent with COVID-19 <u>and</u> had severe or critical illness <u>or</u> are severely immunocompromised, you should isolate at home until:
 - At least 20 days have passed since your symptoms first started and
 - At least 24 hours have passed since your fever resolved (without the use of medication) and
 - Your other symptoms have improved.
- 3) If you did not have any symptoms consistent with COVID-19, you should isolate at home until;
 - 10 days have passed since your first COVID-19 test was done.
- 4) If you did not have any symptoms consistent with COVID-19 and are severely immunocompromised, you should isolate at home until:
 - 20 days have passed since your first COVID-19 test was done.

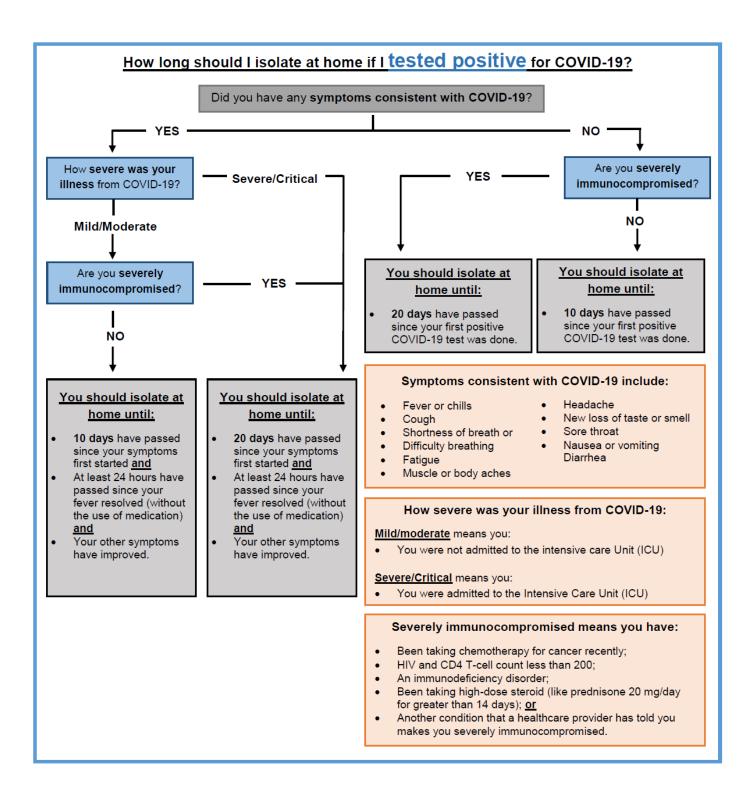

Contact your healthcare provider or Public Health Nursing for any questions.

Guidance may change as new information becomes available. Please look for the most up-to-date recommendations.

TOHONO O'ODHAM NATION HEALTH CARE

Updated 7/27/2020 (subject to change)

 $\label{thm:composition} \textbf{Guidance may change as new information becomes available. Please look for the most up-to-date recommendations.}$

TOHONO O'ODHAM NATION HEALTH CARE

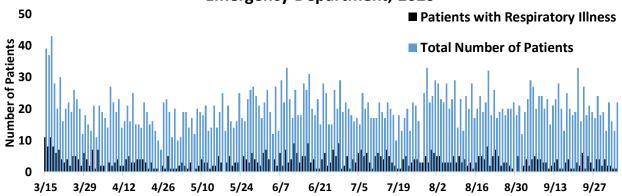

Updated 7/27/2020 (subject to change)

Sells Emergency Department Syndromic Surveillance

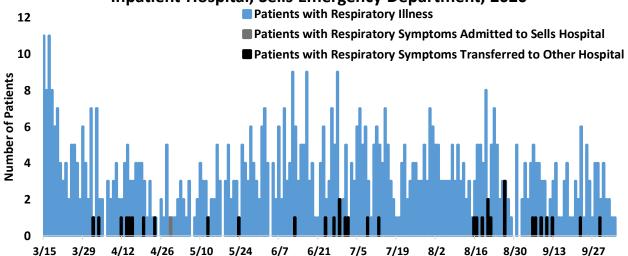

Syndromic surveillance refers to detection of indicators that are discernible before confirmed diagnoses are made. For example, an increase in the number of patients seen with respiratory symptoms could be an indicator of COVID-19. There were between 1 to 4 patients seen daily in Sells Emergency Department with respiratory symptoms during the week of 9/29/20–10/5/20. Same-day COVID-19 testing began on 4/20/20. From 9/29/20–10/5/20, between 13 and 22 patients were seen each day in the emergency department.

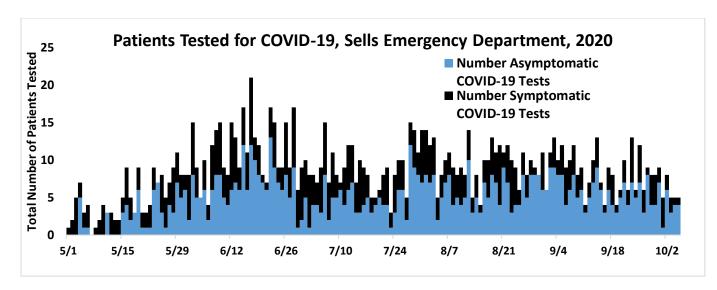

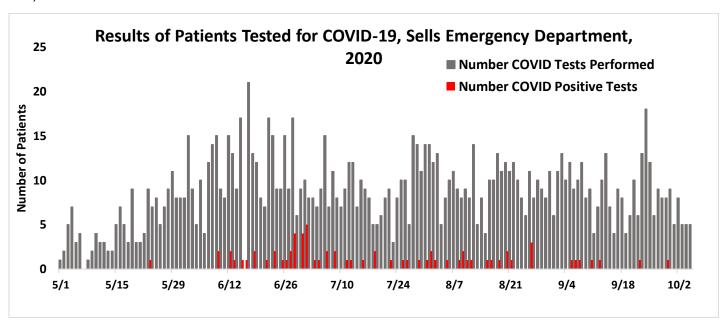

As of 10/5/2020, there was 1 admission to Sells Hospital and 35 outside transfers for respiratory symptoms from Sells Emergency Department. The number of patients transferred from the emergency department to hospital inpatient units helps to identify severity of disease among the population. This is a level of disease severity that requires a higher level of care, such that care must be managed in the hospital (e.g. with oxygen, mechanical ventilation, etc.).

Patients Presenting with Respiratory Illness and Number of Patients Transferred/Admitted from Emergency Department to Inpatient Hospital, Sells Emergency Department, 2020

Asymptomatic tests are performed on people who have no symptoms (no cough, no diarrhea, no fever, etc.). Symptomatic tests refer to tests performed on people who have symptoms (cough, fever, diarrhea, etc.) of COVID-19.

The week of 9/29/20–10/5/20, 1 person seen in the emergency department tested positive for COVID-19. There have been a total of 71 positive test results from tests performed in Sells emergency department

EMPLOYEE HEALTH

254 TONHC employees (374 encounters) have been evaluated by employee health for respiratory symptoms related to illness or other reasons (as of 7:00 10/7/2020).

5 TONHC employees are currently sick including 4% of TONHC nurses and 0% of medical providers (as of 7:00 10/7/2020).

12 employees tested positive for COVID-19. There has been no known employee-to-employee transmissions or patient-to-employee transmissions at TONHC. Each positive result has prompted an internal and external investigation and contact tracing. Based on these investigations, transmissions were more likely due to community spread. Employees possibly exposed are tested for COVID-19.

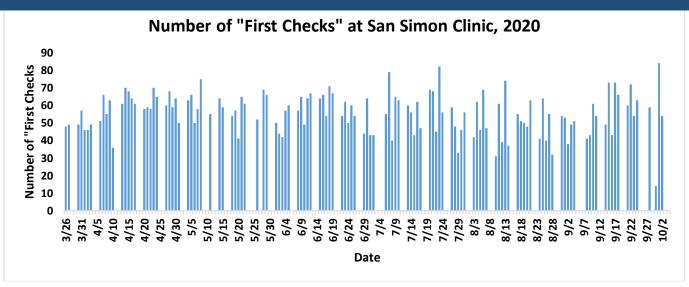

All employees are required to contact Employee Health with any call-outs. This is to ensure that employees are tested for COVID-19 if sick or exposed and given appropriate guidance on when to return to work. Employees are also required to contact their supervisor when they call out.

TONHC Infection Control

Infection control prevents or stops the spread of infections in healthcare settings. TONHC COVID-19 infection control team monitors, tracks, and provides guidance on personal protective equipment (PPE such as gowns, gloves, face shields, N95 respirators).

- At the San Xavier, Sells, and San Simon Health Care Centers, the Battelle CCDS Critical
 Care Decontamination System™ is being used to decontaminate N95 respirators using
 concentrated, vapor phase hydrogen peroxide (Emergency Use Authorization (EUA) issued
 by US Food and Drug Administration (FDA)).
- All staff are wearing procedure/surgical masks, and staff caring for patients are also wearing eye protection.
- Staff caring for patients that have or may have been exposed to COVID-19 are wearing gowns, gloves, face shields or other eye protection, and N95 respirators or Powered Air Purifying Respirators (PAPRs).

CLINIC – SAN SIMON

Some data are missing the month of August 2020

A "first check" is asking questions such as about loss of smell or taste, sore throat, fever, cough, and/or difficulty breathing when anyone is entering the clinic or hospital grounds. First checks includes employees and patients. As first checks are with entry, they occur multiple times per day for some people. The number of first checks is the number of times questions of respiratory symptoms were asked.

Some data are missing the month of August 2020

1

0

These are the number of tests for COVID-19 performed on patients that have no symptoms of COVID-19 (no fever, no cough, no difficulty breathing, etc.). They are performed on people who have had exposure to COVID-19, are entering a congregate setting, or are going to be admitted to the hospital.

CLINIC - SAN XAVIER

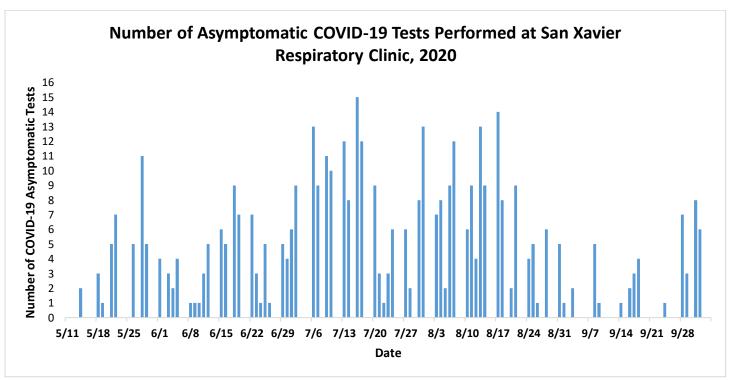

Some data are missing the month of May, August, and September 2020

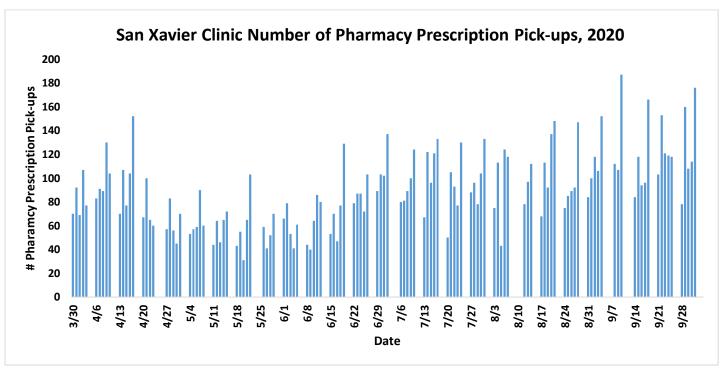

Some data are missing the month of August and September 2020

16 patients were seen in the same day respiratory clinic and transported to the hospital from San Xavier clinic.

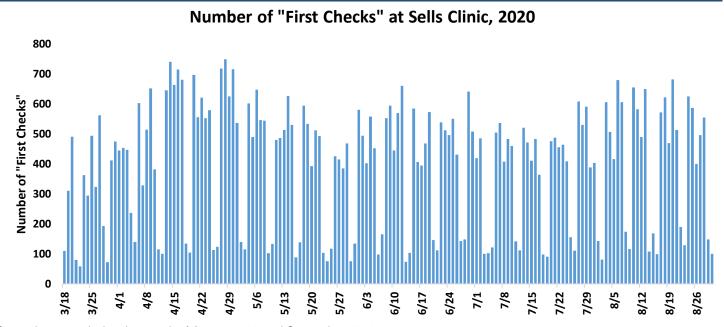

Some data are missing the month of August and September 2020

These are the number of tests for COVID-19 performed on patients that have no symptoms of COVID-19 (no fever, no cough, no difficulty breathing, etc.). They are performed on people who have had exposure to COVID-19, are entering a congregate setting, or are going to be admitted to the hospital.

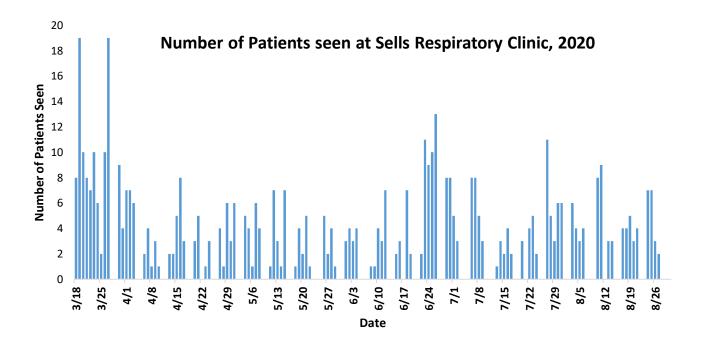

As of August 5, 2020, San Xavier Health Care Center has a drive-up pharmacy for patients to pick-up their pharmacy prescriptions.

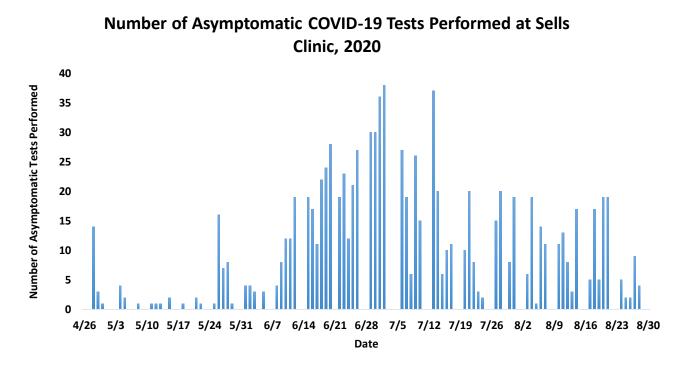

CLINIC - SELLS

Some data are missing the month of August 2020 and September 2020

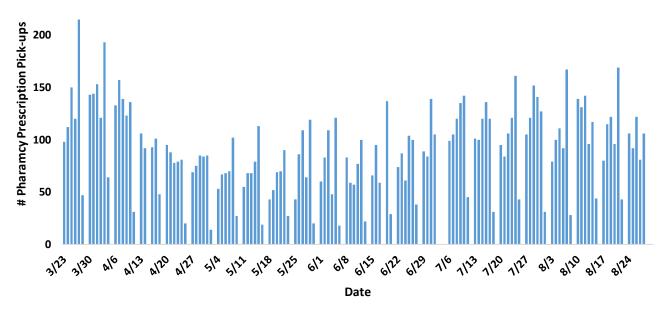

15 patients seen were transferred to the emergency room, 5 patients were directly admitted to the hospital. 3/21/20 and 3/22/20 included patients seen in the emergency department.

These are the number of tests for COVID-19 performed on patients that have no symptoms of COVID-19 (no fever, no cough, no difficulty breathing, etc.). They are performed on people who have had exposure to COVID-19, are entering a congregate setting, or are going to be admitted to the hospital.

As of August 25, 2020, Sells Health Care Center has a drive-up pharmacy for patients to pick-up their pharmacy prescriptions.

SELLS INPATIENT UNIT

To minimize possible exposure and conserve personal protective equipment, visitors are not allowed on the inpatient wards. Exceptions are for a minor, woman in labor, and special circumstances. In accordance with state enhanced surveillance advisory related to COVID-19, daily information has been reported to Arizona State using EMResource.

1 patient was admitted to Sells Hospital who tested positive for COVID-19. Inpatient, in-hospital transportation, and postmortem protocols have been developed. Every patient admitted to the inpatient unit of Sells hospital is tested for COVID-19.

Med/Surge Bed Availability – 10 (9/30/20)

Med/Surge Bed Capacity – 12, with 7 additional beds available if needed for emergency situations

No intensive care unit services

250

Negative Pressure Rooms – 2 inpatient rooms, 1 in emergency department (inpatient rooms are used by emergency department or other clinics when indicated).

For all transfers outside of TONHC we are calling the Arizona Surge Line. The Arizona Surge Line is a 24/7 toll-free statewide system activated 4/22/20 to keep hospitals and regions of Arizona from being overwhelmed by facilitating COVID-19 patient admission, transfer, and discharge to appropriate levels of care.

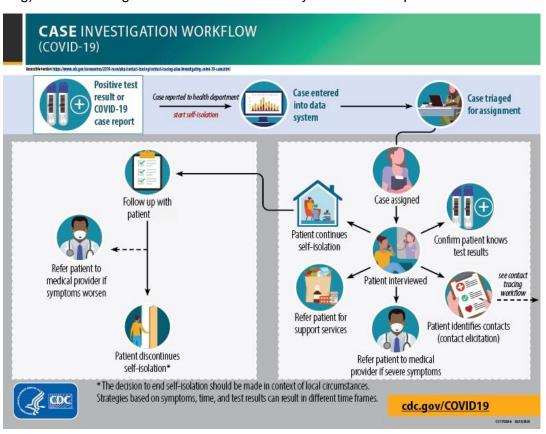

In preparation, our outpatient clinic staff has been cross-trained in inpatient patient care. To date we have trained 16 member of the healthcare workforce to manage patients in the hospital setting. Cross-training will allow us to increase the number of patients we can take care of on the inpatient unit. Please note that Sells hospital is not an intensive care unit, so we cannot take care of patients with COVID-19 requiring intensive respiratory treatment. These patients would be transferred to intensive care units at other sites.

From 7/20/20 to 7/30/20 a critical care response team (CCRT) composed of doctors and nurses with critical/intensive care training arrived at TONHC to provide training in COVID-19 response care and ventilator management. As of 7/28/2020, 56 TONHC employees have been trained on ventilators and ventilator management. Visit evaluation was completed on 8/3/2020.

PUBLIC HEALTH NURSING – CONTACT TRACING

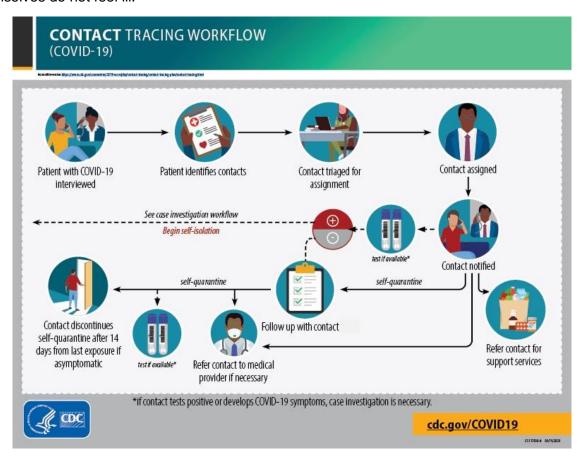

As of 9/30/2020 at 12:00, a total of 1,414 individual contact tracings have occurred in the Tohono O'odham Nation.

TONHC public health nursing conducts case investigation and contact tracing (involves interviewing). Case investigations are initiated on everyone who tests positive for COVID-19.

Contact tracing, a core disease control measure, is a key strategy for preventing further spread of COVID-19. Contact tracing is part of the process of supporting patients with suspected or confirmed infection. In contact tracing, public health nursing works with patients to help them recall everyone with whom they have had close contact during the timeframe in which they may have been infectious. To protect patient privacy, contacts are only informed that they may have been

exposed to a patient with the infection. They are not told the identity of the patient who may have exposed them. Contacts are provided with education, information, and support to understand their risk, what they should do to separate themselves from others who are not exposed, how to monitor themselves for illness, and the possibility that they could spread the infection to others even if they themselves do not feel ill.

Executive Order No. 2020-08 (7/2/20):

WHEREAS, COVID-19 cases continue to rise at an alarming rate in the state of Arizona, and surrounding hospitals, which the Nation rely on, are reaching maximum capacity. The Nation is also seeing an increased number of cases linked to community spread, which has put the health and safety of Nation's members at heightened risk. Due to the increased threat to the health and safety of Nation's members the Chairman, in consultation with Tohono O'odham Health Care COVID-19 Medical Team, has determined that Stay at Home orders must be reinstated.

NOW, THEREFORE BE IT RESOLVED, by the authority vested in the Chairman of the Nation, the Chairman restates the following orders, as amended:

 The Human Resources Return to Work – Standard Operating Procedures, and any subsequent revisions, adopted by Executive Order No. 2020-05, remain in effect; all Executive Branch departments and programs must adhere to the minimum requirements set forth therein. Employees who fail to report to work when assigned are subject to disciplinary action under the Executive Branch Personnel Policies Manual; and

- 2. The Tohono O'odham Nation Unified Command *Guidelines: Wakes/Funerals*, and any subsequent revisions, adopted by Executive Order No. 2020-05, remain the minimum standards for all wakes and funeral held on the Nation until further notice. In addition:
 - a. Individuals in charge of/hosting wakes/funerals, or their designees, are responsible for ensuring all attendees comply with all social distancing and face covering requirements within this order, and as recommended by CDC.
 - b. All wakes and funerals held on the Nation shall be limited to one-day services only.
 - c. If necessary, district leadership is to implement additional standards; and
- 3. The Curfew for all Nation's residents, reinstated by Executive Order No. 2020-06, remains in effect until further notice. During the Curfew hours (9pm and 6am) residents shall remain home unless one of the following exceptions applies:
 - a. Individuals working at a business in operation during the curfew hours, or traveling to or from work;
 - b. Individuals patronizing or operating a business;
 - c. Individuals seeking medical care, or traveling to or from those services;
 - d. Individuals traveling to provide necessary care for another who cannot care for themselves; or
 - e. Individuals seeking safe harbor from a dangerous situation.
- 4. All playgrounds and sports areas, such as football fields, basketball courts, etc., shall remain closed until further notice, as order by Executive Order No. 2020-06; and
- 5. The following social distancing requirements, as order by Executive Order No. 2020-07, shall remain in effect, as amended here:
 - a. When leaving the home, physically distance yourself from others who do not reside in your household by maintaining a 6ft distance from others, when possible.
 - b. With the exception of persons residing in the same household, all social gatherings are hereby *prohibited* until further notice. "Social gatherings" shall include all events and activities held for social and/or community purposes. Religious services and traditional ceremonies are not considered social gatherings, however, any activities held in association with a religious services or ceremony for social purposes (i.e. gathering before/after for eating, drinking, dancing, socializing, etc.) are prohibited.
 - c. Individuals are *required* to wear face coverings in all public spaces where physical distancing is not possible.
 - i. "Public Spaces" means any place that is accessible by the general public (indoor and outdoor), including but not limited to: all governmental facilities, grocery stores, gas stations, convenience stores, post offices, establishments serving food or beverages, establishments offering recreational activities or entertainment and places that offer medical or health services or transportation to the general public.
 - ii. "Face masks or coverings" means cloth, fabric or other soft material that covers the nose and mouth. Coverings may be homemade or factory-made, or may be improvised from ordinary materials such as a scarf or bandana.
 - iii. Limited Exceptions. Face coverings are not required for children under the age of two (2), in accordance with CDC guidelines; individuals who should not wear face coverings due to medical conditions, mental health conditions, or developmental disabilities; or first responders where face covering would interfere with their duties.
 - d. Individuals should wash hands and/or use hand sanitizer regularly, avoid touching their face, and disinfect frequently touched surfaces regularly.
 - e. Individuals are discouraged from unnecessary travel.
 - f. Individuals who become ill and demonstrate signs and symptoms related to COVID-19 should remain out of the public, however, are encouraged to seek treatment and testing.

6. Tribal enterprises and businesses, operating within the exterior boundaries of the Nation, are required to implement guidelines consistent with CDC Guidelines to protect the health and safety of employees and the general public, including requiring face coverings for employees and customers/visitors at all times in public spaces, (as amended by Executive Order No. 2020-06).

BE IT FURTHER RESOLVED, by the authority vested in the Chairman of the Nation, the Chairman hereby reinstates Stay At Home orders within the exterior boundaries of the Nation, effective immediately:

Individuals residing on the Nation:

- 1. All individuals who reside on the Nation are ordered to stay at home or at their place of residence, except as needed for employment, medical, health, safety, and food for themselves or their family members.
- 2. This section does not apply to employees or volunteers for essential services and businesses in operation that have been determined by the Nation, Districts, and entities on the Nation.

Entering the Tohono O'odham Nation:

- 1. Individuals and businesses are not allowed to enter the exterior boundaries of the Tohono O'odham Nation, except for:
 - a. Employees and volunteers of essential services on the Nation
 - b. Medical and healthcare providers
 - c. Deliveries of medicine, food, and other essential items
 - d. Public and private transportation services necessary for the health and safety needs of the individuals on the Nation
 - e. Mail services
 - f. Financial services
 - g. To patronize a business in operation
 - h. Businesses that provide maintenance services that are necessary to maintain the health and safety of the households or buildings on the Nation
 - i. Other necessary professional services as needed
- 2. Businesses and others entering districts for the purpose of providing services or delivering supplies must provide notice to Districts before entering.

BE IT FINALLY RESOLVED, that the Chairman of the Nation strongly urge religious leaders of every denomination practicing within the exterior boundaries of the Nation to suspend in-person services, and instead find other ways to spread their messages in a safe manner during this health pandemic. Mask requirements remain applicable to all religious services, in accordance with order. Additionally, all CDC Guidelines should be adhered to, including by not limited to social distancing, hand washing or hand sanitizing stations readily available, frequent disinfecting of facilities/communal spaces, etc.

ORDERED this 2nd Day of July, 2020 in Sells, Arizona.

COVID-19 Response Summary

Unified Command

Current and Planned Objectives:

- Operational functions teams that have been stood up in support of the COVID-19 response will be assessed to determine need for either continual sustainment or demobilization. Transitional plans will be developed for elements that will be phased-out.
- Continue to monitor need and activities for the Alternate Care Site(s) (ACS) non-congregate facility to sustain the capacity for housing potential COVID-19 positive patients. Low level medical needs.
- Continue to monitor activity and workload of task forces/workgroups to perform gap analysis, resource assessment, contingency planning, partner outreach, and other tasks as required
- Maintain oversight of PPE resource management by acquiring, monitoring, tracking, distributing resource assets, and storing for future needs
- In partnership with key stakeholders, develop, implement, and update plans/processes/protocols for gradually and strategically returning the workforce and reopening of businesses while protecting public health and slowing the spread of COVID-19.
- Maintain global, national, and state situational awareness of COVID-19 outbreak impacts and any surge in cases that might come from the border environment.
- Maintain continuous coordination with TON-HC Hospital and Clinic locations for operational support thru the Unified Command
- Maintain operational communications with internal and external stakeholders
- Integrate best practices and up-to-date safety guidance for the first responder community, healthcare/medical community, supporting personnel, and stakeholders
- Establish consistent community messaging and education to internal/external stakeholders
- Maintain an up-to-date financial and cost analysis of incident-related expenditures and provide updates to senior leadership

Command Emphasis:

- The Unified Command will continue to coordinate with external partners and agencies to achieve operational objectives.
- Ensure all orders for PPE requests are synchronized, tracked and distributed. EOC resource orders
 must be submitted using a 213-RR and submitted via eoc@tonation-nsn.gov
- Integrate additional stakeholders to operational briefings with the intent to foster a common operating picture and enhance working partnerships
- Maintain COVID-19 situational awareness of impacts, response actions, and gap analysis for effective support
- In addition to the COVID-19 pandemic public safety will still need to coordinate response to day-to-day (LE, Fire, EMS)
- The Unified Command must acknowledge and recognize sensitive political, legal, and security issues and develop strategies and or solutions to help establish: clear lines of authority, accountability procedures, personnel relief and rehabilitation, situational awareness, environmental conditions
- Avoid "tunnel vision"; stress causes people to focus narrowly on the things they consider most important and it may be the wrong thing for the given time.
- Ensure the accountability of deployed personnel/equipment that receive work assignments thru the EOC
- Keep the Policy Group and senior leadership adequately informed
- Sustain an operational battle rhythm, to include Planning P methodologies, Incident Action/Coordination/Support Planning
- Coordinate unified public messaging with all partner agencies

COVID-19 Response Summary

Strategic Actions:

- TON-HC and Unified Command continue to coordinate in supporting the COVID-19 cases. UC Task
 Force Leader communicates with TON-HC if patient(s) need to be housed in an Alternate Care Sites.
- Unified Command Distribution Team continues in filling resource requests from approved 213-RR's.
- Unified Command Compliance Team continues to monitor the department's compliance with all required safety precautions and assist departments with implementing safety measures.
- Unified Command continues with planning efforts through the State for testing support.
- On Friday, October 2, 2020, TONHC and Unified Command conducted the first operation of the
 October Flu Clinics at the Tohono Plaza in Sells, AZ from 11:30am 5:30pm
- On Wednesday, October 7, 2020, TONHC and Unified Command conducted the first After Hour Flu Clinic at the Tohono Plaza in Sells, AZ from 4:00pm – 7:00pm.
