What's New?

Low Transmission Moderate Transmission Substantial Transmission

High Transmission

Most Arizona communities including Pima County and the Tohono O'odham Nation are in **HIGH** transmission risk level and hospitalizations from COVID-19 are increasing. Public Health urges people to increase personal COVID-19 precautions: avoid crowds and indoor gatherings, especially where persons are unvaccinated.

If you must be in public spaces indoors, wear a mask, regardless of your vaccination status. Incorporate extra precautions into any holiday plans.

COVID-19 Vaccination

Vaccination remains the best protection. All persons ages 5 years and older should get COVID-19 vaccinations.

Variant-Omicron

A new COVID-19 variant of concern called Omicron has been identified in many countries, including the USA. At this time, it is not known if Omicron variant causes different symptoms, disease severity, or be resistant to vaccines or treatments.

TON COVID-19 Vaccination Program

COVID-19 Vaccines for children: CDC now recommends that all children 5 years and older get vaccinated against COVID-19. Widespread vaccination for COVID-19 is a critical tool to best protect everyone, especially those at highest risk, from severe illness and death.

COVID-19 Vaccine is available through TONHC to:

- TON members or other tribal members and TONHC patients
- Non-Native persons who work with or on the TON
- Non-Native persons who reside in a household with a tribal member or on the Nation

CDC currently recommends COVID-19 vaccination for:

- Children ages 5 years and older and ALL ADULTS
- Women who are pregnant, breastfeeding, trying to get pregnant, or might become pregnant in the future,
- Persons who have been infected with COVID-19 once they recover and/or have completed isolation.
- Persons who received monoclonal antibody treatments (mAB), 90 days after treatment.

NEW (Nov 2021) COVID-19 Boosters recommended for ALL ADULTS, not just high-risk

- Persons aged 18 years and older who received Pfizer-BioNTech or Moderna COVID-19 vaccines should get a booster at least 6 months after completing their primary COVID-19 vaccine series (total of 3 shots).
- Persons aged 18 years and older who received Johnson & Johnson (Janssen) vaccine should get a booster at least 2 months the first dose (total of 2 shots).
- All adults should get a COVID-19 vaccine booster.

Moderately to severely immunocompromised people

- Persons with weakened immune systems ages 12 years and older who received Pfizer-BioNTech or Moderna COVID-19 vaccines should receive a third dose 28 days after completing their primary COVID-19 vaccination series and a booster dose 6 months after the 3rd dose (total of 4 shots).
- Persons with weakened immune systems, ages 18 years and older, who received Johnson & Johnson (Janssen) vaccine COVID-19 vaccine should get a booster dose at least 2 months after their single-dose J&J/Janssen primary shot (total of 2 shots). No recommendation for more boosters at this time.

Any of the COVID-19 vaccines authorized in the United States may be used for the booster doses

COVID-19 Laboratory Testing at TONHC

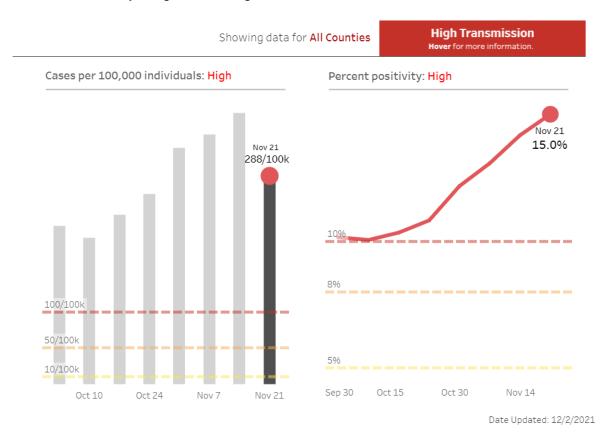

Total Covid-19 Tests Performed at TONCH through 12/1/2021	20775
Total Tests Performed in Past 7 Days	277

Testing Available at TONHC

COVID-19 testing began at TONHC on March 23, 2020. Same-day testing is available at San Xavier, Sells, and San Simon Health Centers. On-site same-day testing began on April 20, 2020. There are two different in-house testing platforms currently: same-day/rapid test for symptomatic patients or same-day PCR testing (testing for SARS CoV-2, Flu A, Flu B, and RSV using one swab, starting February 1, 2021). Send-out testing is for specific cases. Effective 8/1/21, in-house antibody testing was discontinued, however testing can still be ordered and sent to the reference laboratory.

Arizona COVID-19 School Benchmarks

On March 2nd, 2021 CDC announced updated school guidance. The Arizona Department of Health Developed Community Transmission to Reflect Level of Community Risk: CDC recommends the use of two measures of community burden to determine the level of community transmission. These measures assess the incidence and spread of COVID-19 in the community, not the school itself. Risk is dependent on community level transmission and implementation of school and community mitigation strategies.

Indicator	Low Transmission	Moderate Transmission	Substantial Transmission	High Transmission
Total new cases per 100,000 persons in the last 7 days	0 – 9	10 – 49	50 – 99	≥ 100
Percentage of nucleic acid amplification tests (NAATs) that are positive during the past 7 days	<5.0%	5.0% – 7.9%	8.0% – 9.9%	≥ 10.0%

Arizona Department of Health Services, https://www.azdhs.gov/documents/preparedness/epidemiology-disease-control/infectious-disease-epidemiology/novel-coronavirus/schools/school-benchmarks.pdf, accessed 3/11/21.

Sells Emergency Department

Door to transfer time, the amount of time it takes to transfer a patient to another facility for higher-level care from the time they entered the emergency department, has increased dramatically for Sells Emergency Department since August 2021 due to COVID-19. September door to transfer time was over 500 minutes. As higher-level care hospitals continue to see increased COVID-19 cases, Sells ED patients will continue seeing increased wait times.

Month	Door-to-Transfer time for Sells Hospital ED	Total Visits
June 2021	262 minutes	753
July 2021	292 minutes	742
August 2021	402 minutes	859
September 2021	531 minutes	833
October 2021	439 minutes	761

Sells Hospital uses the Arizona Surge Line for all COVID-19 transfers outside of TONHC. The Arizona Surge Line is a 24/7 toll-free statewide system activated 4/22/20 to keep hospitals and regions of Arizona from being overwhelmed by facilitating COVID-19 patient admission, transfer, and discharge to appropriate levels of care.

SELLS INPATIENT UNIT

To minimize possible exposure and conserve personal protective equipment, visitors are not allowed on the inpatient ward. Exceptions are for pediatric patients, patients in labor, and other special circumstances. In accordance with state enhanced surveillance advisory related to COVID-19, daily information is reported to Arizona State using EMResource.

Medical Bed Capacity through 12/1/2021	2
ICU	0
Negative Pressure Rooms	2 - inpatient ward, 1- Emergency Department
COVI-19 patients admitted to TONHC to date	3

PUBLIC HEALTH NURSING - CONTACT TRACING

Number of PHN contact tracings through 12/1/21	4653
--	------

TONHC public health nursing conducts case investigation and contact tracing (involves interviewing). Case investigations are initiated on everyone who tests positive for COVID-19.

Persons residing off Tohono O'odham Nation are contacted by health departments from their respective county of residence.
