Omicron COVID-19 Variant

Arizona surveillance testing has detected Omicron cases in Pima County, including the Tohono O'odham Nation. Omicron is more contagious than most previous variants. Being fully vaccinated AND boosted is your best protection against Omicron. If Omicron is resistant to vaccines, we have the tools to update the vaccines.

Transmission Risk Level

Tohono O'odham Nation is in HIGH transmission risk level. Arizona hospitals report that ~95% of all regular and intensive care beds (ICU) are full. Public Health urges people to increase personal COVID-19 precautions: avoid crowds and indoor gatherings, especially where persons are unvaccinated. If you must be in public spaces indoors, wear a mask, regardless of your vaccination status. Incorporate extra precautions into all holiday plans. Celebrate outdoors and limit attendance.

COVID-19 Vaccination

Vaccination remains the best protection. All persons ages 5 years and older should get COVID-19 vaccinations. All adults and teens ages 16 years and older should get a booster vaccine 6 months after their primary series. Find a vaccine close to you at www.vaccines.gov

Isolation and Quarantine Guidelines

Most people infected with COVID-19 infection spread the virus to others within 2 days after becoming infected and continue to spread virus for ~3 more days. CDC shortened the isolation and quarantine guidelines for the general public to 5 days to reflect this updated information, however, they include strict mask-wearing for a minimum of 5-10 days to prevent spreading virus.
