	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10%	10-14%	≥15%
If total new cases ≥200/week	New COVID-19 admissions per 100,000 population (7-day total)	Not applicable	<10.0	≥10
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	Not applicable	<10.0%	≥10%

Transmission Risk Levels

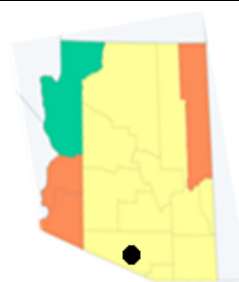

<https://www.cdc.gov/coronavirus/2019-ncov/science/community-levels.html>

CDC's new system to determine the COVID-19 transmission risk level by county analyzes three metrics.

CDC will this every Thursday at 8pm EST:

- New COVID-19 admissions per 100,000 population in the past seven days
- The percent of staffed inpatient beds occupied by COVID-19 patients
- Total new COVID-19 cases per 100,000 population in the past seven days.

TONHC will follow Pima County's risk level.

Mask Mandates-What to do?

While some communities are removing mask mandates, masks may still be appropriate in public indoor spaces, regardless of vaccination status, depending upon your personal risks, the activity, and how much COVID-19 transmission is in your community.

Who should wear a mask?

People with symptoms, a positive COVID-19 test, or exposure to someone with COVID-19 should wear a mask until they are no longer contagious or completed isolation. Masks continue to be required while in public transportation including buses, airplanes, trains and ride-shares. Until more children are vaccinated, wearing masks can help reduce transmission in schools.

In general, CDC states that people do not need to wear a mask outdoors or in areas where the COVID-19 Community Level is low or medium, regardless of vaccination status. If you are at high risk for severe disease, talk to your healthcare provider about whether you would be safer to wear a mask and take other actions such as testing.

Even if your community does not mandate mask use, you can lower your personal risk for getting infected or transmitting COVID-19 transmission by making safer choices in higher risk activities. Some risk factors for severe illness from COVID-19 include age ≥50 years, weakened immune systems, obesity, chronic heart, lung, kidney, liver disease, cancer, rheumatologic diseases, and use of medications that weaken the immune system. Unvaccinated persons still have the highest risk of being infected and getting hospitalized.

If you are going to be in a crowded public area, you can be safer wearing a well-fitted mask. Getting vaccinated is the best way to protect yourself and people around you. Please continue to follow all Executive Orders while on the Tohono O'odham Nation regarding COVID-19 precautions.

TON COVID-19 Vaccination Update: March 16, 2022

The following graphics show COVID-19 vaccination rates for persons who receive care through TONHC, and specifically among Tohono O'odham Nation Members. Data are retrieved from TONHC's Resource and Patient Management System (RPMS) and the Arizona State Immunization Information System (ASIIS). Vaccination data of TON members who received vaccinations through PIMC are also included. Some vaccinations obtained outside TONHC may be undercounted due to a data exchange disruption between RPMS-ASIIS and will be included when available.

Testing Available at TONHC

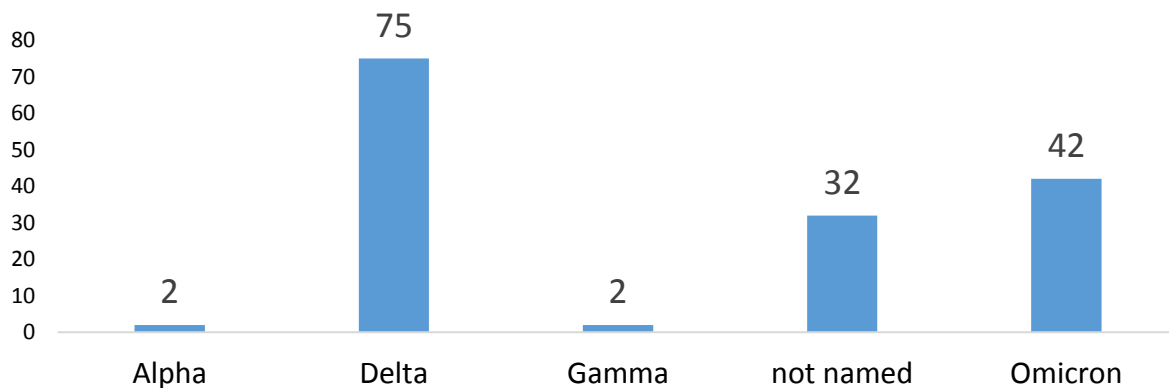

COVID-19 testing began at TONHC on March 23, 2020.

On-site same-day testing began on April 20, 2020 and expanded to same-day testing at San Xavier, Sells, and San Simon Health Centers.

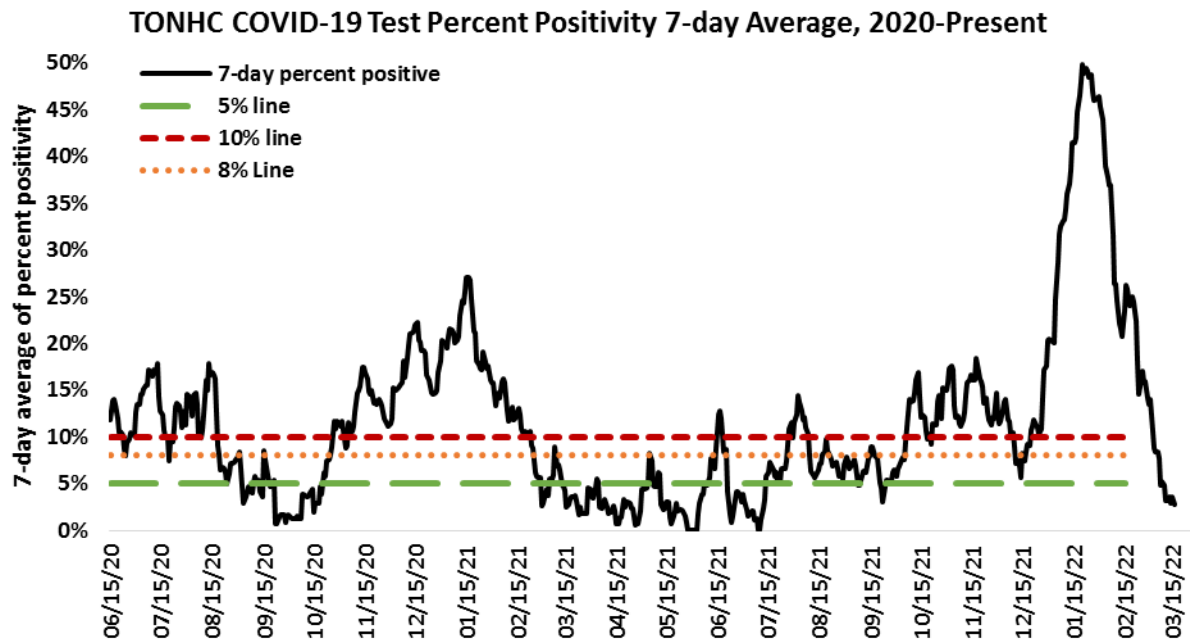

TONHC uses three testing modalities: in-house Nucleic Acid Amplification (Abbott ID NOW) and PCR testing (testing for SARS CoV-2, Flu A, Flu B, and RSV using one swab (began Feb. 1, 2021).

Send-out PCR testing is also available through Sonora Quest.

Sells Emergency Department

Door to transfer time, the amount of time it takes to transfer a patient to another facility for higher-level care from the time they entered the emergency department, has increased dramatically for Sells Emergency Department since August 2021 due to COVID-19. As higher-level care hospitals continue to see increased COVID-19 cases, Sells ED patients will continue seeing increased wait times.

Month	Door-to-Transfer time for Sells Hospital ED	Total Visits
June 2021	262 minutes	753
July 2021	292 minutes	742
August 2021	402 minutes	859
September 2021	531 minutes	833
October 2021	439 minutes	761
November 2021	533 minutes	807
December 2021	455 minutes	717

Sells Hospital uses the Arizona Surge Line for all COVID-19 transfers outside of TONHC. The Arizona Surge Line is a 24/7 toll-free statewide system activated 4/22/20 to keep hospitals and regions of Arizona from being overwhelmed by facilitating COVID-19 patient admission, transfer, and discharge to appropriate levels of care.

SELLS INPATIENT UNIT

To minimize possible exposure and conserve personal protective equipment, visitors are not allowed on the inpatient ward. Exceptions are for pediatric patients, patients in labor, and other special circumstances. In accordance with state enhanced surveillance advisory related to COVID-19, daily information is reported to Arizona State using EMResource.

PUBLIC HEALTH NURSING – CONTACT TRACING

County and State Health Departments will assist TON with COVID-19 notifications

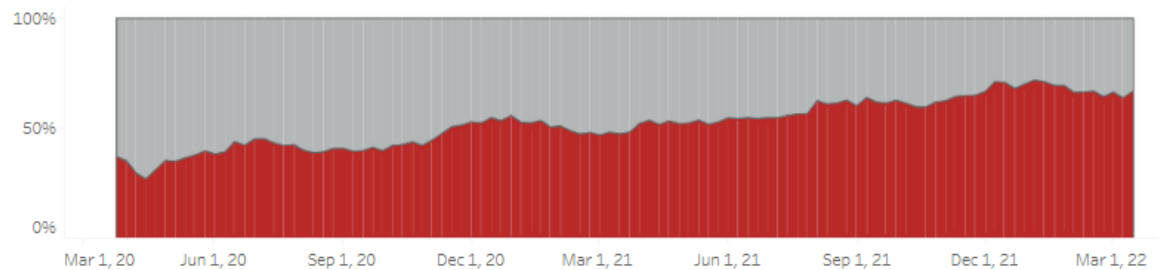

The current surge in COVID-19 cases is causing delays for health departments across the state to contact persons infected with COVID-19. During the surge, Pima and Pinal County Health Departments and the Arizona Department Health Services (ADHS) will assist the Tohono O'odham Nation to notify persons who test positive for COVID-19 and persons they might have had contact with. Please cooperate with the health departments if they contact you.
