COVID-19 Situation Update: March 2, 2022

T-Ñukuda Ha'icu Cihañig

This is a rapidly evolving situation. Information is recent as of March 2, 2022 at 7:00 and may change as more data is available.

What's New?

Low Transmission	Moderate Transmission	Substantial Transmission	High Transmission
------------------	-----------------------	--------------------------	-------------------

High Transmission Risk Level

COVID-19 Omicron cases continue to decrease, but transmission risk level locally remains **HIGH**. High transmission rate of COVID-19 is when the case count is >100/100,000 population or when there is >10% test rate positivity in a community. While some communities have dropped below HIGH transmission rates, Pima County and TON remain with HIGH Transmission. TON case counts have dropped from a peak of 113 cases/day to 5 cases/day. Until transmission rates drop to moderate or low levels, CDC recommends wearing masks in indoor public spaces.

COVID-19 Vaccines and Boosters

FDA has fully approved two COVID-19 vaccines: Moderna's for ages ≥18 years and Pfizer's for ages ≥16 years. The agency is still waiting for more data about COVID vaccines for children 6 mo.-4 years old before review. All persons ages ≥5 years should get COVID-19 vaccinations and all persons ages ≥12 years should get a booster, 5 months after their primary series. People with weak immune systems get boosters 3 months after the primary series. Vaccination on TON continues to be extremely protective.

COVID-19 treatments

Three new, highly effective medications for COVID-19 are available through TONHC. These include: Sotrovimab (monoclonal antibody effective against Omicron, given through a vein), and two antiviral medications (Paxlovid-taken by mouth), and Remdesivir (given through a vein). These treatments are authorized for patients at highest risk for serious COVID-19 disease, especially older persons and people with underlying health conditions.

TON COVID-19 Vaccination Update: February 15, 2022

Due to data retrieval issues, vaccination rates are not updated this week and are current as of February 15, 2022.

The following graphics show COVID-19 vaccination rates for persons who receive care through TONHC, and specifically among Tohono O'odham Nation Members. Data are retrieved from TONHC's Resource and Patient Management System (RPMS) and the Arizona State Immunization Information System (ASIIS). Vaccination data of TON members who received vaccinations through PIMC are also included. Some vaccinations obtained outside TONHC may be undercounted due to a data exchange disruption between RPMS-ASIIS and will be included when available.

Total Tests Performed in Past 7 Days	181

Testing Available at TONHC

COVID-19 testing began at TONHC on March 23, 2020.

On-site same-day testing began on April 20, 2020 and expanded to same-day testing at San Xavier, Sells, and San Simon Health Centers.

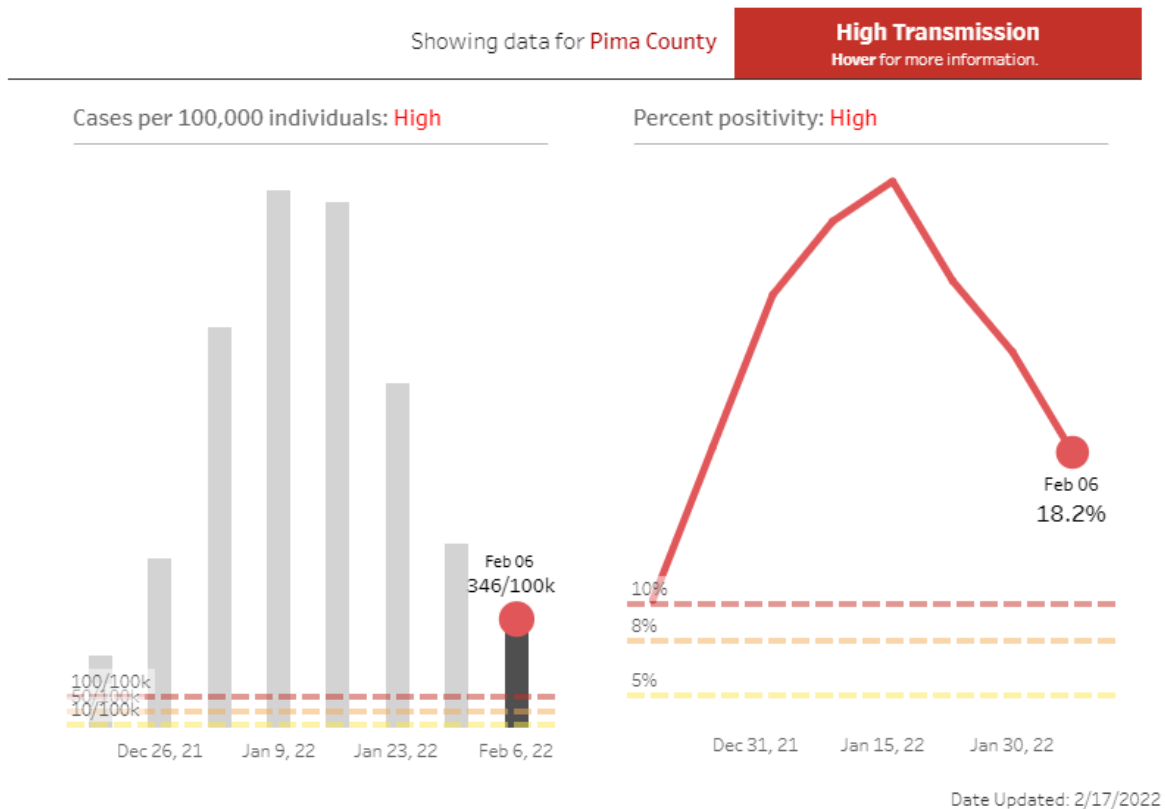

TONHC uses three testing modalities: in-house Nucleic Acid Amplification (Abbott ID NOW) and PCR testing (testing for SARS CoV-2, Flu A, Flu B, and RSV using one swab (began Feb. 1, 2021).

Send-out PCR testing is also available through Sonora Quest.

After CDC recommended to not use serologic testing, effective 8/1/21, in-house antibody testing was discontinued,

Arizona COVID-19 School Benchmarks

On March 2nd, 2021 CDC announced updated school guidance. The Arizona Department of Health Developed Community Transmission to Reflect Level of Community Risk: CDC recommends the use of two measures of community burden to determine the level of community transmission. These measures assess the incidence and spread of COVID-19 in the community, not the school itself. Risk is dependent on community level transmission **and** implementation of school and community mitigation strategies. Arizona Department of Health Services may stop publishing state rates in this dashboard beginning in March, 2022.

Indicator	Low Transmission	Moderate Transmission	Substantial Transmission	High Transmission
Total new cases per 100,000 persons in the last 7 days	0 – 9	10 – 49	50 – 99	≥ 100
Percentage of nucleic acid amplification tests (NAATs) that are positive during the past 7 days	<5.0%	5.0% – 7.9%	8.0% – 9.9%	≥ 10.0%

Sells Emergency Department

Door to transfer time, the amount of time it takes to transfer a patient to another facility for higher-level care from the time they entered the emergency department, has increased dramatically for Sells Emergency Department since August 2021 due to COVID-19. As higher-level care hospitals continue to see increased COVID-19 cases, Sells ED patients will continue seeing increased wait times.

Month	Door-to-Transfer time for Sells Hospital ED	Total Visits
June 2021	262 minutes	753
July 2021	292 minutes	742
August 2021	402 minutes	859
September 2021	531 minutes	833
October 2021	439 minutes	761
November 2021	533 minutes	807
December 2021	455 minutes	717

Sells Hospital uses the Arizona Surge Line for all COVID-19 transfers outside of TONHC. The Arizona Surge Line is a 24/7 toll-free statewide system activated 4/22/20 to keep hospitals and regions of Arizona from being overwhelmed by facilitating COVID-19 patient admission, transfer, and discharge to appropriate levels of care.

SELLS INPATIENT UNIT

To minimize possible exposure and conserve personal protective equipment, visitors are not allowed on the inpatient ward. Exceptions are for pediatric patients, patients in labor, and other special circumstances. In accordance with state enhanced surveillance advisory related to COVID-19, daily information is reported to Arizona State using EMResource.

PUBLIC HEALTH NURSING – CONTACT TRACING

County and State Health Departments will assist TON with COVID-19 notifications

The current surge in COVID-19 cases is causing delays for health departments across the state to contact persons infected with COVID-19. During the surge, Pima and Pinal County Health Departments and the Arizona Department Health Services (ADHS) will assist the Tohono O'odham Nation to notify persons who test positive for COVID-19 and persons they might have had contact with. Please cooperate with the health departments if they contact you.
